Release Notes

PocketBook Touch Lux 3

Implemented:

1. Enhanced procedure of *Wi-Fi* connection. Now there is no need to turn off Wi-Fi to save power, Wi-Fi-module automatically goes into power saving mode when there is no transmission of information via the interface. It is enough to configure Wi-Fi connection to access point once for further automatic network connection establishing.

2. The graphical interface of firmware updating process (instead of text mode, which was used previously).

3. More comfortable books samples reviewing in *BookStore* application.

5. Increasing of the file system scanner speed (indexing of books in *Library* application now runs two times faster).

6. Further elaboration of app *Library*: the books covers rendering speed has been increased; scrolling of the lists in the application has become more comfortable.

7. Modification of *ReadRate* service (enhanced performance of ReadRate menu).

8. *Browser* app performance has been increased.

Fixed:

1. In some cases an incorrect display of the number of items in the search results in *Library* app.

2. In some cases the wrong recognition of paging gesture while reading books in *pdf* format.

3. Incorrect fields cropping in the *DjVu* format when cropping separately odd and even pages.

4. Possible reader application "freezing" in the case of dictionary usage in *pdf*-formatted documents with cropped fields.

5. Possible Device "freezing" after creating of large number of user profiles.

6. Other minor changes.
